

1. General Comments

- Thanks for letting me review your stuff. I did my best to help you, but due to my limited knowledge, I'm afraid that I misunderstood. Please let me know when you need clarification.
- I deeply impressed regarding the way you organized your github page. It was really helpful for me to understand your works and the additional literature that you incorporated with your work.
- I really enjoyed looking through your code and learned a lot from you, especially the final part of exercise 2 and exercise 5.

2. Mathematical Derivation: I think you did an excellent job. Easy to understand and I really cannot find any suggestions or problems.

3. Codes

- Excellent job on Gradient Descend and Stochastic Gradient Descend. I really like your inline comments.
- Excellent job in cross-validation, Collin Mallows' Cp statistic function in exercise 5.
- I think that you also perfectly visualized your work. I learned a lot from you!
